RAYNHAM, Mass., September 17, 2015- Medrobotics Corp., a surgical products company with core competencies in medical robotics, announced today that it was recognized as the 2015 Innovative Company Award winner in the Biotechnology and Life Sciences category at the Fastest Growing and Innovative Company annual awards ceremony by the Providence Business News.

“I am honored and proud to accept yet another New England area innovation award on behalf of the entire Medrobotics team,” said Samuel Straface, Ph.D., President and CEO of Medrobotics. “We are deeply grateful to be recognized for our history of innovation in the greater Providence area and Bristol County Massachusetts, and we remain committed to bringing the benefits of minimally invasive surgery to more patients around the world.”

Minimally invasive surgery has demonstrated advantages for patients and providers compared to traditional open procedures, decreasing hospital stays and recovery times. Medrobotics’ Flex® Robotic System was designed to provide an affordable, easy-to-use robot-assisted surgical platform for hospitals and surgeons seeking to provide minimally-invasive treatment options to the broadest number of patients.

About Medrobotics

Medrobotics Corporation (www.Medrobotics.com) is a privately-held company headquartered in Raynham, Massachusetts that manufactures and markets the Flex® Robotic System, a robot-assisted platform that provides surgeons with single-site access and visualization of hard-to-reach anatomical locations. The Company’s vision is to provide more patients with access to minimally invasive surgery. Medrobotics received FDA clearance for the Flex® Robotic System in July 2014, and the CE mark in March 2014.
