

Medrobotics Gains ISO 13485: 2003 Certification for the Design, Manufacture, Service and Distribution of the *Flex^o System*

Company Prepares for Commercialization of the Ground-Breaking *Flex^o System* in Otolaryngology

FOR IMMEDIATE RELEASE Contact: Diane Wilson (978) 656-1258

RAYNHAM, Mass., November 3rd, 2013-Medrobotics Corporation, an emerging medical robotics company developing the innovative *Flex^o System*, today announced that it received ISO (International Organization for Standardization) 13485 certification from the notified body BSI Group, for its quality management system. This is an important milestone supporting the design, manufacture, distribution and service of the *FlexTM System* and is a prerequisite for regulatory clearances in many parts of the world, including the European Union. "I am proud we have received ISO 13485 certification, which recognizes our pursuit of quality and commitment to our customers' needs," said Dr. Samuel Straface, president and CEO of Medrobotics Corporation.

ISO 13485 is an internationally recognized quality standard that requires an organization to demonstrate that it has the comprehensive quality management systems in place to enable the consistent design, development, production, installation, and delivery of medical devices that are safe for their intended purpose.

About Medrobotics

Medrobotics Corporation (www.Medrobotics.com) is a privately-held company headquartered in Raynham Massachusetts that is developing and commercializing the *FlexTM System*, a robotic-assist platform that enables surgeons to gain single-site access and visualization to difficult-to-access anatomical locations. The system provides a precise and stable platform for enhanced visualization and enables two-handed dexterity with compatible third-party instruments having tactile feedback.
